

CABLE TENSION METERS MODEL C-SERIES

**MODELS AVAILABLE TO MEASURE UP TO 1,000 LB TENSION
IN FLEXIBLE CABLE DIAMETERS AS LARGE AS .625"
Easy to Read Dials in Pounds or Kilograms**

The Model C-Series Cable Tension Meters are specifically designed to measure static tension in round material configurations such as cable, wire, rope, and guy wires as well as narrow rectangular wire, bands, and straps. These instruments can be handheld for applications with line speeds up to 25 feet per minute; speeds greater than this require permanent mounting of the instrument. The models available are as follows:

Model	Max. Range	Resolution	Model	Max. Range	Resolution
C-1000	1,000 lb	10 lb	C-500kg	500 kg	10 kg
C-500	500 lb	5 lb	C-250kg	250 kg	5 kg
C-200	200 lb	2 lb	C-100kg	100 kg	1 kg
C-100	100 lb	1 lb	C-50kg	50 kg	.5 kg

- ◆ **Direct Reading Dials eliminate the need for reference tables**
- ◆ **Calibration is simple with the built-in micrometer adjustment**
- ◆ **Engagement and disengagement onto materials is quick and easy**

(For instrument ranges 500 lb and lower, the instrument width is 16.75")
(For the 1000 lb range, the instrument width is 19.75")

The C-Series cable tension meters are portable mechanical instruments that weigh approximately 6 lbs. and are made of non-corrosive materials. Each instrument is provided with a sturdy polyethylene carrying case with dense foam inserts to protect it. Made in the U.S.A.
